NM	Non-motor side spec.

* The available selections for encoder type, motor type, ball screw lead and stroke vary depending on the actuator type. For details, please refer to the page featuring each actuator type.

RCP5W-RA6C

RoboCylinder Water-proof rod type
24-V Pulse motor

Actuator width: 65 mm

Model Specification Items	RCP5W — RA6C — WA — <input type="checkbox"/> — <input type="checkbox"/> — <input type="checkbox"/> — <input type="checkbox"/> — <input type="checkbox"/> — <input type="checkbox"/> — <input type="checkbox"/> — <input type="checkbox"/>
	Series — Type — Encoder type — Motor type — Lead — Stroke — Applicable controller — Cable length — Options
	WA: Battery-less absolute specification 42P: Pulse motor, size 42 <input type="checkbox"/> 42SP: High-thrust pulse motor, size 42 <input type="checkbox"/>
	12: 12mm 6: 6mm 3: 3mm
	50 : 50mm 400 : 400mm (every 50-mm)
	P3: PCON-CA MSEP MSEL
	N: None P: 1m S: 3m M: 5m X <input type="checkbox"/> <input type="checkbox"/> : Specified length R <input type="checkbox"/> <input type="checkbox"/> : Robot cable
	Refer to the option list below. * If the high-thrust pulse motor is selected, the actuator comes standard with option B (Brake).

Radial Load Applicable

* Depending on the model, there may be some limitations to using the vertical mount position.

- (1) The maximum payload is the value when operated horizontally and vertically at 0.3G and 0.5G, respectively. Note that raising the acceleration causes the payload to drop.
- (2) The horizontal payload is calculated by assuming that an external guide is also used.
- (3) The high-thrust specification is designed exclusively for vertical operation. It comes standard with a brake.
- (4) The cable joint connector is not splash-proof, so install the connector in a location where it will not come in contact with water.

Correlation Diagrams of Speed and Payload

Due to its pulse motor characteristics, the RCP5 series provides lower payload at higher speed. Check the tables below to see if the desired speed and payload can be achieved.

Radial Load Applicable

* Depending on the model, there may be some limitations to using the vertical mount position.

- (1) The maximum payload is the value when operated horizontally and vertically at 0.1G for lead 5 and 0.2G for lead 10 and lead 20. Note that raising the acceleration causes the payload to drop.
- (2) Please note that the RA8C requires a dedicated controller (PCON-CFA).
- (3) The horizontal payload is calculated by assuming that an external guide is also used.
- (4) The cable joint connector is not splash-proof, so install the connector in a location where it will not come in contact with water.

Correlation Diagrams of Speed and Payload

Due to its pulse motor characteristics, the RCP5 series provides lower payload at higher speed. Check the tables below to see if the desired speed and payload can be achieved.

Actuator Specifications

Dimensional Drawings

CAD drawings can be downloaded from the website.

www.robotcylinder.de

2/3D CAD

*1 Connect the motor and encoder cables.
*3 The orientation of the width across flats varies from one product to another.

*2 The rod moves to the ME during home return, so pay attention to possible contact with surrounding structures and objects.

*4 When installing the actuator using the front housing or flange, make sure the actuator does not receive any external force.

Materials of Key Components

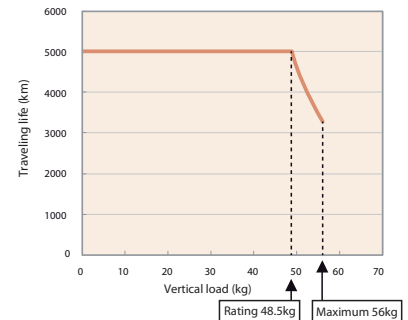

① Frame	Aluminum extrusion material (A6N015S-T5 or equivalent) with white alumite coating
② Base	Aluminum extrusion material (A6N015S-T5 or equivalent) with white alumite coating
③ Front bracket	Aluminum die-cast
④ Rear bracket	Aluminum die-cast
⑤ Rear cover	Aluminum die-cast
⑥ Motor cover	Aluminum extrusion material (A6063SS-T5 or equivalent) with white alumite coating
⑦ Rod	Aluminum drawn tube (A6063TD-T83 or equivalent), polished + hard alumite coating
⑧ Actuator cable	Polyvinyl chloride (PVC)
⑨ Intake/exhaust port	Polyphenylene sulfide (PPS)

Dimension with Flange (Optional)

Note
If an actuator with lead 5 is installed vertically, the service life of the actuator varies significantly depending on its payload. Please refer to the correlation diagram of vertical load and traveling life shown below. (If the actuator is installed horizontally, its service life is not affected by the payload.)

Dimensions with Brake (Optional)

Rod Deflection of RCP5W-RA8C (Reference Values)

(The graph below shows the measurements of how much a horizontally installed rod would deflect when a load is applied to the end of the rod. The measured deflection include the deflection due to the weight of the rod.)

Applicable Controllers

The RCP5W series actuators can be operated by the controllers indicated below. Please select the type depending on your intended use.

Name	External view	Model number	Maximum number of positioning points	Input power	Reference page
Positioner type		PCON-CFA-60PWAI-NP-2-0 PCON-CFA-60PWAI-PN-2-0	512 points	DC24V	Refer to the PCON catalog.
Pulse-train type		PCON-CFA-60PWAI-PLN-2-0 PCON-CFA-60PWAI-PLP-2-0	—		
Field network type		PCON-CFA-60PWAI-①-0-0	768 points		

*① Field network specification code (DV, CC, PR, CN, PRT, EC, EP)

RCP5W-RA10C

RoboCylinder
24-V Pulse motor

Splash-proof rod type

Actuator width: 108 mm

Model Specification Items

RCP5W — **RA10C** — **WA** — **86P** —

Encoder type

WA: Battery-less absolute specification

Motor type

86P: Pulse motor, size 86

Lead

10: 10mm
5: 5mm
2.5: 2.5mm

Stroke

50: 50mm
800: 800mm (every 50-mm)

Applicable controller

P4: PCON-CFA

Cable length

N: None
P: 1m
S: 3m
M: 5m
X: Specified length
R: Robot cable

Options

Refer to the option list below.

Radial Load Applicable

* Depending on the model, there may be some limitations to using the vertical mount position.

- (1) The maximum payload is the value when operated horizontally and vertically at 0.01G for lead 2.5, 0.02G for lead 5, and 0.04G for lead 10. Note that raising the acceleration causes the payload to drop.
- (2) Please note that the RA10C requires a dedicated controller (PCON-CFA).
- (3) The horizontal payload is calculated by assuming that an external guide is also used.
- (4) The cable joint connector is not splash-proof, so install the connector in a location where it will not come in contact with water.

Actuator Specifications

Item	Description
Drive system	Ball screw Ø20mm (Lead 2.5/10mm), Ø16mm (Lead 5mm), rolled C10
Positioning repeatability	±0.02mm
Lost motion	0.1mm or less
Rod	Ø40 aluminum drawn tube
Non-rotating accuracy of rod (*1)	±0 deg
Allowable load/allowable torque at end of rod	Refer to page 16 (or to the RCP5 rod type manual)
Lost offset distance at end of rod	100mm or less
Protective structure	IP65
Ambient operating temperature, humidity	0 to 40°C, 85% RH or less (Non-condensing)

(*1) Rod's angular displacement in rotational direction with no applied load is shown.

Offset distance at end of rod (100mm or less)

Dimensional Drawings

CAD drawings can be downloaded from the website.

www.robotcylinder.de

2/3D CAD

*1 Connect the motor and encoder cables.

*3 The orientation of the width across flats varies from one product to another.

*2 The rod moves to the ME during home return, so pay attention to possible contact with surrounding structures and objects.

*4 When installing the actuator using the front housing or flange, make sure the actuator does not receive any external force.

Materials of Key Components

①	Frame	Aluminum extrusion material (A6N01SS-T5 or equivalent) with white alumite coating
②	Base	Aluminum extrusion material (A6N01SS-T5 or equivalent) with white alumite coating
③	Front bracket	Aluminum die-cast
④	Rear bracket	Aluminum die-cast
⑤	Rear cover	Aluminum die-cast
⑥	Motor cover	Aluminum extrusion material (A6063SS-T5 or equivalent) with white alumite coating
⑦	Rod	Aluminum drawn tube (A6063TD-T83 or equivalent), polished + hard alumite coating
⑧	Actuator cable	Polyvinyl chloride (PVC)
⑨	Intake/exhaust port	Polyphenylene sulfide (PPS)

Dimension with Flange (Optional)

Rod Deflection of RCP5W-RA10C (Reference Values)

(The graph below shows the measurements of how much a horizontally installed rod would deflect when a load is applied to the end of the rod. The measured deflection includes the deflection due to the weight of the rod.)

Correlation Diagrams of Vertical Load and Traveling Life

Since the RCP5W-RA10C has a greater maximum thrust than other types, its service life varies significantly depending on the payload and push force applied when the actuator is installed vertically. When selecting an appropriate type from the correlation diagram of speed and payload or correlation diagram of push force and current-limiting value, check its traveling life on the correlation diagram of payload and service life as well as on the correlation diagram of push force and service life.

Note
The rated value represents the maximum value at a traveling life of 5000km. The greatest value is the maximum value at which the actuator can operate.
Take note that, if an actuator is operated beyond its rating, its service life will drop as shown by the applicable graph on the right.

Applicable Controllers

The RCP5W series actuators can be operated by the controllers indicated below. Please select the type depending on your intended use.

Name	External view	Model number	Maximum number of positioning points	Input power	Reference page
Positioner type		PCON-CFA-86PWAI-NP-2-0 PCON-CFA-86PWAI-PN-2-0	512 points	DC24V	Refer to the PCON catalog.
Pulse-train type		PCON-CFA-86PWAI-PLN-2-0 PCON-CFA-86PWAI-PLP-2-0	—		
Field network type		PCON-CFA-86PWAI-①-0-0	768 points
